INTENDED USE

The Air Scrubber by Aerus attaches directly to the HVAC system ductwork to reduce viruses, bacteria, and other contaminants in the ambient air and on surfaces in businesses and homes up to 2,000 sq. ft.

BENEFITS

- Provides continuous surface decontamination and air purification in real time
- Safely removes allergy and asthma triggering contaminants
- Protects your heating and cooling system from potentially dangerous buildup

Watch this video to learn how ActivePure® can help protect the people and places you care about, giving you air you can trust.

HOW IT WORKS

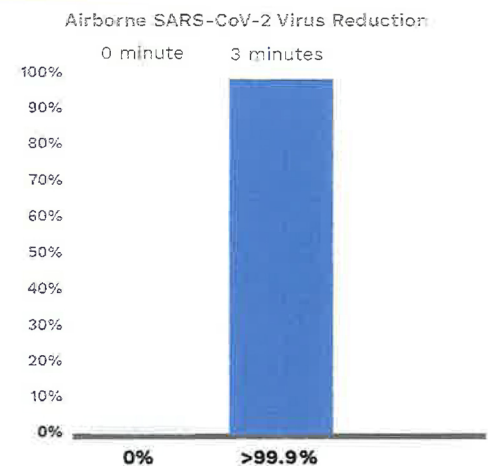

The ActivePure® Technology uses high-intensity UVC light and a catalytic process to produce scrubber ions and hydroperoxides that inactivate contaminants on surfaces and in the air.

This technology continuously protects and purifies the environment around you.

Installed directly into the existing HVAC system ductwork.

PROOF IT WORKS

ActivePure Technology was tested on live SARS-CoV-2 virus, not proxy or surrogate strains like many competing technologies use.

NEW PURE & CLEAN UNIT TESTING
Testing done at UTMB BSL Level 3 Lab with assistance from BSL Level 4 Lab, complying with FDA protocols in a FDA Certified Compliant Laboratory.
